2015 – 2019

Grade A+

## AWARDS

### NGIRI Ignite Wining for Final Year Project (FYP)

HEC, Pakistan

2023

## ABOUT **ME**

I am a recent graduate with a Bachelor's degree in Software Engineering, having 1 year of experience in designing and building Web and Mobile Applications. I have completed my Final Year Project that aims to address the problem of parking through a React Native application, using Express, Node JS, MongoDB and Figma for an application design and UI. With my hands-on experience in both front-end and back-end development, I am well-equipped to contribute to an organization's growth and success.

## EXPERIENCE

### FULL STACK DEVELOPER (Onsite)

*Codrivty, I-8 Markaz Islamabad / May 2023 – Present*

- Utilizing my expertise in web development, working in React JS, Shopify, and API Integration from Django backend.
- Complete project in React JS while integrating endpoints from backend.
- Negotiation with backend team, customize endpoints and develop an appealing product.
- Handle international clients while maintaining effective communication.
- I continue to expand my skill set by learning web scraping techniques.
- I learned to work within deadlines and enhance my leadership skills.

### FRONT & BACKEND DEVELOPER - Intern (Remote)

*BOT Solutions / Dec 2022 – Feb 2023*

- "E-Installment Application" – Completed responsive application in PHP, MySQL as a backend database and Bootstrap, HTML, CSS and JavaScript for application design.
- "Customer-Developer Relation" – MERN stack application using MongoDB as the backend database using Express and Node JS on the server.
- I learned to work in different frameworks, and increase my skill set.
- Strengthened team-building skills, enabling effective collaboration within a team.
- Enhanced time management skills.

### DEVELOPER

*Self-Projects / Sep 2022 – Present*

- ✓ **E-Parking Challan App / FYP** (April 2022 – Sep 2023)  
Developed a mobile application using React Native, employing Express, Node JS, and MongoDB Atlas.  
I learned to develop a mobile application while working on both frontend & backend.
- ✓ **Coffee Shop MERN Application** (Nov 2022 – Dec 2022)  
Developed a responsive MERN stack application for coffee selling shop, as a semester project.  
I learned to design responsive website using ReactJS, Express, and NodeJS and successfully deployed an application on GitHub.
- ✓ **Flower Selling Responsive Website** (Sep 2022 – Oct 2022)  
Developed a responsive website for flower selling shop as my semester project using pure HTML, CSS, JavaScript, and PHP.  
I learned to design responsive website using pure HTML, CSS, JS, and PHP.
